FOR FRAMELESS GLASS

VITRIS 120

soft close sliding doors

SOFT CUSHIONING
gentle closing

The VITRIS 120 sets new standards for sliding doors with a cushioned comfort stop, and all mechanics being concealed within the track. The glass doors slow gently and quietly, regardless of weight and speed of closure, and over a distance of several centimetres. A slim square cover profile and either a flush pull or double pull handle, complete the detail of finish and function.
